PROFESSIONAL SUMMARY

Java Developer with 3+ years of experience building and modernizing business applications using Java, Spring Boot, Spring Security, React, PostgreSQL, and MySQL. Delivered client transaction platforms, insurance-related applications, CRM systems, and internal workflow tools, including a client-facing platform supporting 500–1,000 active users. Experienced in REST APIs, role-based access control, authentication, database performance optimization, third-party API integration, automated testing with JUnit and Mockito, and legacy system modernization. Led development of an internal workflow project and mentored new hires.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend: Java, Spring Framework, Spring Boot, Spring Security, REST APIs, JPA/Hibernate

Security: Authentication, Authorization, Role-Based Access Control, JWT

Databases: PostgreSQL, MySQL

Frontend: React, HTML, CSS

Testing: JUnit, Mockito

Integrations: Location APIs, Address Autofill APIs, SMS OTP, Email OTP

Tools & Practices: Git, Maven, Agile/Scrum, Code Reviews, Database Query Optimization, Legacy System Modernization

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Bridgeculture Inc.

Dec 2022 – Feb 2026

- Developed a client-facing web transaction platform supporting 500–1,000 active users, enabling business clients to transact with other clients through a centralized application.
- Contributed to a web application for an insurance company, building and maintaining features based on evolving business requirements.
- Led development of an internal workflow and attendance system that digitized leave, undertime, overtime, and attendance processes.
- Built reusable, business-critical features including dynamic form builders, user registration, authentication, and role-based access control.
- Modernized legacy applications into modern CRM systems, and designed and optimized PostgreSQL and MySQL database tables and queries to support new features.
- Improved slow data retrieval by analyzing SQL query execution plans, adding indexes, and removing unnecessary joins.
- Integrated third-party services (address autofill, location, SMS/email OTP) and wrote automated unit tests using JUnit and Mockito to validate application logic.
- Mentored new hires and collaborated within a 10-member Agile team on sprint planning, code reviews, testing, and production defect resolution.

EDUCATION

Bachelor of Science in Information Technology

University of Cebu – Main | 2021–2026

Dean's Lister, AY 2021–2022
